

Using A Balanced Scorecard For Financial Stability

Duration: 5 Days

Language: en

Course Code: MG2-141

Objective

Upon completion of this course, participants will be able to:

- Understand how a scorecard can help you track performance.
- Provide balanced data from a scorecard to attract investors.
- Create a project plan for the future based on scorecard metrics.
- Constantly review your scorecard performance and metrics to aim for continuous improvement.
- Advertise and promote your scorecard to improve your reputation as an employer and forward-thinking business.
- Overcome challenges based on scorecard data.
- Forecast and predict future trends in the market using scorecard changes.
- Develop performance management strategies, policies, and procedures based on your areas of concern.

Audience

This course is designed for anyone planning projects or maintaining service levels in a successful and profitable business. It would be most beneficial for:

- Business Owners
- Directors
- Executives
- Bid Writers
- Project Planners
- Performance Managers
- Operations Managers
- Data Analysts
- HR Professionals

Training Methodology

This course uses various adult learning methods to aid complete understanding and comprehension. Participants will enter into group discussions to determine the most potent scorecard metrics for their business and create a journey map to display these monitors' impact.

They will view scenario-based videos to see the impacts of scorecard measurement within successful businesses and understand how these changes can reflect well on the company externally. Participants will then work together to create a project plan for their companies to roll out the new scorecard and set up intervals or measurements to aim for continuous improvement.

Summary

In today's society, it isn't just income and profit that make a business successful. A company's external reputation from consumers, knowledge of the wider market and competitors, or even its reputation as an employer is highly regarded. These things and finances help the company grow its reach and turnover equally.

However, these new performance metrics come with challenges. It's easy to monitor profits and losses to understand a company's success. However, monitoring intangible performance and assets using data or typical key performance indicators is a little more difficult.

To resolve this, businesses can use scorecards to prove their positive performance and flag any potential problems to work on for continuous improvement.

A balanced scorecard can focus on recruitment, organisational development, future goals, strategic planning, prioritisation, and automation. It will show your progress throughout any changes and projects you complete and act as a real-time record of your business achievements.

Course Content & Outline

Section 1: Introduction To Scorecard Management

- Scorecard layout and expectations.
- Understanding scorecard benefits.
- How a scorecard can affect your schedule and agenda.
- Project planning based on scorecard data.
- The definition of a successful scorecard.
