

## Islamic Risk Management Products & Treasury Procedures

**Duration:** 5 Days

**Language:** en

**Course Code:** IND12-104

### Objective

Upon completion of this course, participants will be able to:

- Identify the nuances of Shari'a Law regarding finance department management and treasury.
- Understand the most effective Islamic tools to identify risk areas correctly.
- Highlight potential risks and develop mitigation tactics.
- Make a comparative analysis of various treasury applications in different jurisdictions.
- Apply Islamic toolkits to various money markets.
- Manage currency and foreign exchange without creating extra risk.

## Audience

This course is designed for anyone required to make financial decisions according to Sharia Law or those required to highlight potential risk areas to finances or assets using treasury reporting. It would be most beneficial for:

- Business Owners
- Financial Managers
- Chief Financial Officers
- Treasurers
- Accountants
- Property Investors
- Bank Managers Issuing Sukuk
- Financial Account Managers
- Investors in Sukuk

## Training Methodology

This course uses various adult learning techniques to aid full understanding and comprehension. Participants will review videos and participate in interactive presentations to understand the differences imposed on financial institutions when complying with Shari'a Law.

They will work in groups to overcome real-world challenges, utilise Islamic tools to flag risk areas, and develop innovative solutions to minimise financial loss and increase investment and turnover.

## Summary

Under Shari'a Law, managing finance and assets requires avoiding credit or debt processes. Businesses need a well-defined treasury setup and project plan with risk prevention measures. In an Islamic Financial Institution (IFI), staying updated on terminology, trading implications, and Sukuk-influenced treasury procedures is crucial. Reviewing the money market, liquidity management, long-term funding, and capital adequacy is essential to mitigate financial risks. Understanding Islamic financial tools for forex and rate risks helps secure funding and create low-risk, long-term investment opportunities.

# Course Content & Outline
