Financial Acumen And Financial Project Management

Duration: 5 Days

Language: en

Course Code: PF1-129

Objective

Upon completion of this course, participants will be able to:

- Analyse the purpose of project financing techniques.
- Expand the understanding of project financing.
- Examine the key sources of limited-resource debt.
- Reflect on a lender's approach to risk.
- Review how project models to optimise debt amounts, maturity, and re-payment.
- Evaluate the different methods of financing.
- Identify the different types of debt.
- Understand how key risk factors drive structure and loan pricing.
- Build project models and utilise them to balance equity against debt.

Audience

This course is designed for anyone responsible for project finance management within an organisation. It would be most beneficial for:

- Financial Advisors
- Creditors
- Finance Managers
- Project Managers
- Project Sponsors/Lenders
- Financial Analysts
- Financial Auditors
- Operations Managers
- Senior Consultants
- Legal Representatives

Training Methodology

This course uses a variety of adult learning styles to aid full understanding and comprehension. Participants will review real-world documents relating to project finance, such as term sheets and information memorandums, to highlight what typically needs to be included and how to write them successfully.

Through financial exercises, participants will be presented with the necessary tools to develop their knowledge. They will review project finance documents and identify key factors of successful finances and projects where issues have arisen. Participants can then create their own solutions aligned with the agreed-upon contracts. In group discussions, they will demonstrate their theories and assess as a group whether they would be effective.

Summary

Financial project management is crucial for any organization, as finances are key to business success. It involves ensuring proper financial management and timely debt repayment. Long-term project financing, especially for industrial projects or public services, is essential for sustaining business longevity.

A good financial manager must understand financial principles, make swift and effective decisions, and stay within budget. Document management, accounting, and cash flow management skills are also necessary.

Financial project management and financial acumen are closely linked. Effective project management requires financial skills, long-term goal assessment, strong communication for building lender relationships, and risk management.

With financial stability becoming harder to predict, effective financial project management is more important than ever.
