

Project and Contract Management

Duration: 5 Days

Language: en

Course Code: PO4-113

Objective

Upon completion of this course, participants will be able to:

- Understand the integration of projects and contractors to uphold quality standards.
- Implement project risk assessment practices and Quality Assurance and Improvement Programs.
- Recognise the impact of audit planning on the auditing process.
- Manage audits of projects and contractors efficiently.
- Enhance management skills within the audit process.
- Establish actionable audit findings to drive integration and improve efficiency.
- Apply 'Conformance with International Standards for the Professional Practice of Internal Auditing'.

Audience

This course suits a wide range of professionals, including:

- Financial Managers seeking to enhance their understanding of project and contract audits.
- Project Managers aiming to improve efficiency through risk assessment.
- Internal Auditors looking to expand their technical skills and compliance knowledge.
- External Auditors involved in interim audits or agreed-upon procedures.
- Accounting Professionals seeking career advancement opportunities.
- Key stakeholders involved in the implementation of significant projects.

Training Methodology

This course adopts a comprehensive and interactive training methodology, combining theoretical instruction with practical applications. Participants will engage in lectures, hands-on exercises, and group discussions to grasp audit management concepts effectively. Real-world case studies and scenario analyses will provide practical experience in auditing projects and contractors. Role-playing activities and self-assessment tools will facilitate the development of strategic planning, risk assessment, and reporting skills. This multifaceted approach ensures participants are well-equipped to manage audits efficiently and uphold quality standards within their organisations.

Summary

In today's ever-evolving business landscape, corporations face many challenges ranging from environmental concerns to financial complexities. As a result, there's an increased emphasis on internal audit functions to ensure quality and compliance. This course equips participants with the knowledge and skills to plan and execute effective audits of projects and contractors, ultimately meeting predetermined objectives.

Course Content & Outline

Section 1: Understanding Project Management and Contractor Engagement
