

## Sustainable Agribusiness and Environmental Management

**Duration:** 10 Days

**Language:** en

**Course Code:** IND6 - 101

### Objective

Upon completion of this course, participants will be able to:

- Understand the principles and practices of sustainable agriculture.
- Develop skills in agribusiness management, including finance and marketing.
- Learn about climate change impacts and mitigation strategies in agriculture.
- Gain expertise in organic and arable farming techniques.
- Enhance leadership and strategic planning abilities in agribusiness.

## Audience

This course is intended for

- Agribusiness professionals and managers
- Farm owners and operators
- Environmental and agricultural consultants
- Policymakers and NGO staff
- Students and academics in agriculture and environmental science

## Training Methodology

This course uses a variety of adult learning styles:

- **Online Modules** : Pre-course materials and interactive e-learning sessions.
- **In-person Workshops** : Hands-on training and practical exercises.
- **Case Studies and Simulations** : Real-world applications and problem-solving.
- **Peer Networking** : Opportunities to connect with industry professionals.
- **Assessments** : Daily quizzes and a final comprehensive exam to evaluate understanding.

## Summary

The Sustainable Agribusiness and Environmental Management (SAEM) course is designed to equip professionals with the skills and knowledge to lead in the sustainable agriculture sector. This intensive program focuses on agribusiness management, sustainable farming

practices, and environmental stewardship, preparing participants to address the challenges of climate change and promote sustainable agricultural practices.
