

# Comprehensive Management of Airway Diseases

**Duration:** 5 Days

**Language:** en

**Course Code:** IND5 - 145

## Objective

Upon completion of this course, participants will be able to:

- Understand the pathophysiology and epidemiology of major airway diseases.
- Develop proficiency in advanced diagnostic techniques for respiratory conditions.
- Learn about the latest treatment modalities and management strategies.
- Enhance their ability to integrate evidence-based practices into respiratory care.
- Improve patient outcomes through comprehensive management of airway diseases.

## Audience

This course is intended for:

- Pulmonologists
- General practitioners
- Medical professionals specialising in respiratory care
- Nurses and allied health professionals
- Clinical researchers in respiratory medicine
- Graduate students in medicine and respiratory care

## Training Methodology

The course employs a blend of instructional methods, including:

- Interactive lectures
- Hands-on diagnostic and treatment sessions
- Group discussions and case studies
- Expert-led Q&A sessions
- Comprehensive course materials and resources

## Summary

This advanced course provides an in-depth exploration of airway diseases, focusing on current diagnostic techniques, innovative treatment strategies, and comprehensive management approaches. Participants will gain theoretical knowledge and practical skills essential for effectively managing conditions such as asthma, chronic obstructive pulmonary disease (COPD), and other airway disorders. The course combines interactive lectures with hands-on sessions to ensure a well-rounded understanding of respiratory health.

## Course Content & Outline

### Section 1: Fundamentals of Airway Diseases

- Overview of respiratory system anatomy and physiology
- Pathophysiology of asthma, COPD, and other airway diseases

- Epidemiology and risk factors for airway diseases

## **Section 2: Diagnostic Techniques in Respiratory Care**

- Clinical assessment and history-taking for respiratory conditions
- Pulmonary function tests and interpretation
- Imaging techniques: chest X-ray, CT scan, and MRI

## **Section 3: Treatment Modalities**

- Pharmacological treatments: bronchodilators, corticosteroids, and biologics
- Non-pharmacological therapies: pulmonary rehabilitation and lifestyle modifications
- Advanced treatments: bronchial thermoplasty and lung volume reduction surgery

## **Section 4: Managing Chronic Airway Conditions**

- Long-term management of asthma and COPD
- Addressing comorbidities and complications
- Patient education and self-management strategies

## **Section 5: Practical Applications and Case Studies**

- Hands-on diagnostic and treatment practice
- Developing personalised management plans
- Case studies and problem-solving in respiratory care
- Course review, expert Q&A, and certification ceremony

## **Certificate Description**

Upon successful completion of this training course, delegates will be awarded a Holistique Training Certificate of Completion. For those who attend and complete the online training course, a Holistique Training e-Certificate will be provided.

Holistique Training Certificates are accredited by the British Assessment Council (BAC) and The CPD Certification Service (CPD), and are certified under ISO 9001, ISO 21001, and ISO 29993 standards.

CPD credits for this course are granted by our Certificates and will be reflected on the Holistique Training Certificate of Completion. In accordance with the standards of The CPD Certification Service, one CPD credit is awarded per hour of course attendance. A maximum of 50 CPD credits can be claimed for any single course we currently offer.
