

# Advanced Vaccinology And Immunisation Strategies

**Duration:** 5 Days

Language: en

Course Code: IND5 - 157

# **Objective**

Upon completion of this course, participants will be able to:

- Understand the principles of vaccine development and immunology.
- Develop skills in designing and evaluating immunisation programs.
- Learn about the latest advancements in vaccine technology.
- Assess the impact of vaccines on public health.
- Enhance their ability to communicate the benefits and risks of vaccination.

# **Audience**

This course is intended for:

- Public health professionals
- Vaccine researchers and developers
- Immunologists and microbiologists
- Healthcare practitioners involved in immunisation
- · Policymakers in health
- Graduate students in public health, immunology, and related fields

# **Training Methodology**

The course employs a blend of instructional methods, including:

- Interactive lectures
- Hands-on workshops
- Group discussions and case studies
- Expert-led Q&A sessions
- Comprehensive course materials and resources

# **Summary**

This advanced course offers an in-depth exploration of vaccinology and immunisation strategies. Participants will gain comprehensive knowledge of vaccine development, immunisation programs, and the role of vaccines in public health. The course combines theoretical insights with practical applications, equipping healthcare professionals with the skills to advance vaccine research, development, and implementation.

# **Course Content & Outline**

#### **Section 1: Fundamentals of Vaccinology**

- Basic immunological principles and the immune response to vaccines
- History and evolution of vaccines
- Types of vaccines: live-attenuated, inactivated, subunit, and mRNA vaccines

#### **Section 2: Vaccine Development**

- Steps in the vaccine development process
- Clinical trials and regulatory considerations
- Manufacturing and quality control of vaccines

#### **Section 3: Immunization Programs**

- Designing and implementing immunisation programs
- Monitoring and evaluation of vaccine coverage and efficacy
- Addressing challenges in immunisation: access, hesitancy, and logistics

#### Section 4: Vaccine Safety and Public Health Impact

- Vaccine safety monitoring and adverse event reporting
- Risk-benefit analysis of vaccines
- Impact of vaccines on disease eradication and control

#### Section 5: Practical Applications and Case Studies

- Case studies on successful immunisation campaigns
- Hands-on activities: developing vaccine communication strategies
- Collaborative problem-solving in vaccinology
- Course review and expert Q&A

# **Certificate Description**

Upon successful completion of this training course, delegates will be awarded a Holistique Training Certificate of Completion. For those who attend and complete the online training course, a Holistique Training e-Certificate will be provided.

Holistique Training Certificates are accredited by the British Assessment Council (BAC) and The CPD Certification Service (CPD), and are certified under ISO 9001, ISO 21001, and ISO 29993 standards.

CPD credits for this course are granted by our Certificates and will be reflected on the Holistique Training Certificate of Completion. In accordance with the standards of The CPD Certification Service, one CPD credit is awarded per hour of course attendance. A maximum

of 50 CPD credits can be claimed for any single course we currently offer.
