

IT Essentials for Non-Technical Project Managers

Duration: 5 Days

Language: en

Course Code: IND02-121

Objective

Upon completion of this course, participants will be able to:

- Gain a solid understanding of IT's role in project management
- Learn to use IT project management tools effectively
- Develop strategies to manage cybersecurity risks
- Master project planning and organisation skills
- Acquire techniques for monitoring and evaluating IT projects

Audience

This course is intended for:

- Project Managers
- Team Leaders
- Business Analysts
- Product Owners
- Stakeholders overseeing IT projects

Training Methodology

This course uses a variety of adult learning styles to aid full understanding and comprehension. Participants will review case studies to highlight key areas of importance and possible areas for faults. They will be supplied with the best tools required for learning exercises to improve their skills. Participants will analyse the examples to understand how these skills, techniques and methods apply in the workplace.

Summary

IT Essentials for Non-Technical Project Managers is designed to equip non-IT professionals with the knowledge and skills to manage IT projects effectively. This course covers key IT concepts, project management tools, and best practices to bridge the gap between technical and non-technical stakeholders.
