Governmental Support

Mastering Data Governance, Protection And Compliance Management

Duration: 5 Days

Language: en

Course Code: PI2-103

Objective

Upon completion of this course, participants will be able to:

- Understand the principles and importance of data governance.
- Develop and implement data protection strategies.
- Ensure organisational compliance with data-related regulations and standards.
- Manage data lifecycle and ensure data quality and integrity.
- Perform risk assessments and implement mitigation strategies.
- Foster a culture of data protection and compliance within their organisation.

Audience

This course is ideal for:

- Data Protection Officers
- IT Managers and Professionals
- Compliance Officers
- Data Analysts and Scientists
- Risk Managers
- Business Intelligence Professionals
- Any professional involved in data management and protection

Training Methodology

This course uses a variety of adult learning styles to aid full understanding and comprehension. Participants will review case studies to highlight key areas of importance and possible areas for faults. They will be supplied with the best tools required for learning exercises to improve their skills. Participants will analyse the examples to thoroughly understand how these skills, techniques and methods apply in the workplace.

Summary

In today's data-driven world, the ability to govern, protect, and ensure compliance with data regulations is critical for any organisation. This comprehensive course is designed to equip professionals with the knowledge and skills required to manage data effectively, ensuring its integrity, security, and compliance with legal standards. By the end of this course, participants will be able to develop robust data governance frameworks, implement effective data protection strategies, and navigate the complex landscape of data compliance.
