

**Duration:** 5 Days

**Language:** en

**Course Code:** IND01 - 145

### Objective

Upon completion of this course, participants will be able to:

- Understand the fundamental principles of the oil and gas industry.
- Learn about the various stages of the oil and gas lifecycle.
- Gain insights into the latest industry trends and technologies.
- Develop strategic thinking for managing oil and gas projects.

## Audience

This course is intended for

- New entrants to the oil and gas industry.
- Professionals from other sectors seeking industry knowledge.
- Energy sector policymakers and regulators.
- Business analysts and consultants focusing on energy.

## Training Methodology

This course uses a variety of adult learning styles to aid full understanding and comprehension. Participants will review case studies to highlight key areas of importance and possible areas for faults. They will be supplied with the best tools required for learning exercises to improve their skills. Participants will analyse the examples to thoroughly understand how these skills, techniques and methods apply in the workplace.

## Summary

This five-day course offers an in-depth introduction to the oil and gas industry, covering essential aspects from exploration to production. Participants will comprehensively understand industry dynamics, key processes, and current trends.

## Course Content & Outline

### Section 1: Introduction to the Oil & Gas Industry

- Overview of the oil and gas sector.
- Key terminology and concepts.
- Historical development and future outlook.

### Section 2: Exploration and Drilling

- Geological and geophysical methods.
- Drilling technologies and techniques.
- Case studies of exploration success stories.

### Section 3: Production and Operations

- Production methods and technologies.
- Operational challenges and solutions.
- Health, safety, and environmental considerations.

### Section 4: Transportation and Refining

- Oil and gas transportation systems.
- Refining processes and technologies.
- Market dynamics and economic factors.

### Section 5: Emerging Trends and Technologies

- Digital transformation in oil and gas.
- Renewable energy integration.
- Future challenges and opportunities.

## Certificate Description

Upon successful completion of this training course, delegates will be awarded a Holistique Training Certificate of Completion. For those who attend and complete the online training course, a Holistique Training e-Certificate will be provided.

Holistique Training Certificates are accredited by the British Assessment Council (BAC) and The CPD Certification Service (CPD), and are certified under ISO 9001, ISO 21001, and ISO 29993 standards.

CPD credits for this course are granted by our Certificates and will be reflected on the

Holistique Training Certificate of Completion. In accordance with the standards of The CPD Certification Service, one CPD credit is awarded per hour of course attendance. A maximum of 50 CPD credits can be claimed for any single course we currently offer.
